13TH INTERNATIONAL CONGRESS ON EXTREMOPHILES
SEPTEMBER 18/22, 2022 - LOUTRAKI - GREECE

EXTREMOPHILES 2022

September 18-22, 2022

Loutraki (near Athens) Greece

**Companies are encouraged to sponsor the
conference!**

Invitation

Extremophiles 2022

The conference will be held at the **Club Hotel Casino Loutraki** from the 18th - 22nd of September 2022, in **Loutraki** (80 km from Athens, GREECE; <https://www.clubhotelloutraki.gr/hotel/en/>).

The **Extremophiles2022** International Congress aims to bring into light all the recent updates of basic and applied research on “life in extreme environments”. As a result, the program will include sessions in many aspects of “extremophilic research” including, among others, origin of life, ecology, astrobiology, molecular biology, physiology and biotechnology, as well as a special workshop from Mikrobiokosmos (the Hellenic Initiative for Microbial Diversity).

In parallel, the organizers aspire for **Extremophiles2022** to provide a stimulus for high quality research interactions, to inspire young scientists and students through networking with senior and established scientists, and to pave the way for a bright future in this exciting field.

We cordially invite you to participate in Extremophiles2022 and enjoy a stimulating Congress in a vivid and scenic spa resort town by the sea as well as the famous Greek hospitality and cuisine

We particularly encourage young researchers to join and present their work.

We are working hard to ensure an inspiring and memorable Congress!

More details can be found on the regularly updated website:

<http://www.extremophiles2022.org/>

Please forward this mail to your networks and interested colleagues.

Looking forward to meeting you in Loutraki.

On behalf of the Local Organizing Committee,

Professor Konstantinos Vorgias

Congress Chair

Congress chair

Constantinos Vorgias

Biology Department
National and Kapodistrian University of Athens, Greece

Local Organizing Committee

Amalia Karagouni

National and Kapodistrian University of Athens, Greece

Dimitris Chatzinikolaou

National and Kapodistrian University of Athens, Greece

Konstantinos Kormas

University of Thessaly, Greece

Melina Kerou

University of Vienna, visiting scholar at the University of Athens, Greece

International Organizing Committee

Garabed Antranikian

Hamburg University of Technology, Germany

Michael W. W. Adams

University of Georgia, USA

Haruyuki Atomi

Kyoto University, Japan

Don Cowan

University of Pretoria, South Africa

Mosè Rossi

Institute of Biosciences and Bioresources, CNR,
Naples, Italy

Marco Moracci

University of Naples 'Federico II', Naples, Italy

Helena Santos

Universidade Nova de Lisboa, Portugal

Antonio Ventosa

Universidad de Sevilla, Spain

National Advisory Board

Vassillis Bouriotis

University of Crete, Greece

Elias Eliopoulos

Agricultural University of Athens, Greece **Nicolas Kalogerakis**

Technical University of Crete, Greece **Dimitris Kekos**
Metsovio National Technical University, Athens, Greece

Konstantinos Kormas

University of Thessaly, Larisa, Greece

Anna Irimi Koukkou

University of Ioannina, Greece

Vassilis Macris

Metsovio National Technical University, Athens, Greece

George Nounesis

National Centre of Scientific Research, Demokritos, Athens, Greece

Konstantinos Papadimitriou

University of Peloponnese, Greece

Katherine Pappa

National and Kapodistrian University of Athens, Greece

Paraskevi Polymenakou

Hellenic Centre for Marine Research, Crete, Greece

Vassilis Roussis

National and Kapodistrian University of Athens, Greece

Dimitris Stravopodis

National and Kapodistrian University of Athens, Greece

Chrysoula Tassou

Hellenic Agricultural Organisation-DEMETER, Athens, Greece

George Tsangaris

Biomedical Research Foundation of the Academy of Athens, Greece

George Tsiamis

University of Patras, Greece

Myliadis Typas

National and Kapodistrian University of Athens, Greece

International Advisory Board

Sonja-Verena Albers
University of Freiburg, Germany

Thorsten Allers
University of Nottingham, UK

Douglas Bartlett
Scripps Institution of Oceanography, USA

José Carlos Berenguer
Universidad Autonoma de Madrid, Spain

Nils-Kåre Birkeland
University of Bergen, Norway

Jenny Blamey
Fundacion Cientifica y Cultural Biociencia, Chile

Elizaveta Bonch-Osmolovskaya
Russian Academy of Sciences, Russia

Isaac Cann
University of Illinois at Urbana-Champaign, USA

Milton da Costa
University of Coimbra, Portugal

Arnold Driessen
University of Groningen, The Netherlands

Patrick Forterre
Institut Pasteur, France

Donato Giovannelli
Tokyo Institute of Technology, Tokyo, Japan and
Institute of Marine Sciences, CNR, Ancona, Italy

Mohamed Jebbar
Université Bretagne Occidentale Affectation de
recherché, France

Robert Kelly
North Carolina State University, USA

Zvi Kelman
National Institute of Standards and Technology, USA

Eugene V. Koonin
National Center for Biotechnology Information, USA

Tatsuo Kurihara
Kyoto University, Japan

Nikos Kyprides
DOE Joint Genome Institute, USA

Yoshizumi Ishino
Kyushu University, Japan

Wolfgang Liebl
Technical University Munich, Germany

Jennifer Littlechild
University of Exeter, UK

Dominique Madern
CNRS, France

International Advisory Board

Julie Maupin-Furlow
University of Florida, USA

Biswarup Mukhopadhyay
Virginia Polytechnic Institute and State University, USA

Hannu Myllykallio
Ecole Polytechnique, France

Aharon Oren
The Hebrew University, Israel

Tairo Oshima
Tokyo University, Japan

Xu Peng
University of Copenhagen, Denmark

David Prangishvili
Institut Pasteur, France

John Reeve
The Ohio State University, USA

Reinhart Rennenberg
HKUST Hong Kong

Frank Robb
University of Maryland, USA

Christa Schleper
University of Vienna, Austria

Peter Schönheit
Christian-Albrechts-Universität zu Kiel, Germany

Qunxin She
University of Copenhagen, Denmark

Bettina Siebers
University of Duisburg-Essen, Germany

Ken Stedman
Portland State University, USA

Reinhard Sterner
University of Regensburg, Germany

Anwar Sunna
Macquarie University, Australia

John van der Oost
Wageningen University, The Netherlands

Costantino Vetriani
Rutgers University, USA

Malcolm White
University of St. Andrews, UK

Anwar Sunna
Macquarie University, Australia

Scientific audience

The audience in this conference series is a balanced combination of established group leaders and emerging young scientists in their early career, composing a vibrant community interested in next generation technologies and services to keep their research to the top and in creating networks of collaborations with corporate and scientific partners.

Most recent discoveries in the following disciplines will be presented:

- extremophiles: a link between earth and astrobiology
- bioenergetics: transport of solutes across extremophile's membranes
- biotechnology of DNA-associated enzymes in extremophiles
- molecular genetics systems for extremophiles and their applications
- deep-subsurface microbes-piezophiles
- extremophiles for sustainable biorefineries
- microbial immunity, defense, CRISPR, anti-CRISPR and microbe-virus interactions
- genomics, metagenomics, proteomics and culturomics for extremophiles
- microbial communities at extreme conditions and their applications
- novel and sustainable resources from marine extremophiles
- metabolism and physiology evolution of extremophiles
- extreme membranes and transporters
- taxonomy and evolution of extremophilic archaea
- extreme symbioses, deep-sea animal host-microbe associations, microbe-microbe associations in terrestrial hot springs
- extremophiles and biotechnology: current uses and prospects (enzymes of extremophiles, food, ect)

Location

Club Hotel Casino Loutraki

The Organizing Committee calls for sponsorship to support and assure the success of Extremophiles2022

The International Congress of Extremophiles is traditionally recognized as the forum of excellence for exploring the frontiers in basic and applied science of life in extreme environments. Companies supporting Extremophiles2022 have the opportunity to present their most advanced products and services to a very active and international scientific community and are welcome to exploit the space offered in the conference site. Scientific organizations can establish new contacts and create opportunities for joined collaborations and consolidate actions.

Different levels of sponsorship are available and have the following benefits:

DO NOT HESITATE TO ASK FOR SPECIFIC OR TAILORED REQUESTS!
